### **COVID-19 Vaccines Widely Available in NKY – Get Ready for a Great Summer Now**

Florence, Ky. – COVID-19 vaccines are in great supply throughout Northern Kentucky at this time, making it easier than ever to get vaccinated. NKY Health is asking everyone ages 16 and older to take advantage of the many opportunities that are available throughout Northern Kentucky to get protected against COVID-19.

“The days of not being able to find an appointment slot at a vaccination provider have gone away,” stated Dr. Lynne Saddler, District Director of Health for the Northern Kentucky Health Department. “There are so many providers that have vaccines available including clinics that will take appointments or walk-ins, and all three types of vaccine are available in Northern Kentucky – Pfizer, Moderna and Johnson & Johnson. Getting vaccinated now will help us all have a great summer, doing more of what we like to do with family and friends.”

Currently, over 42% of Northern Kentuckians are either partially or fully vaccinated against COVID-19. The goal is to have at least 70% of residents vaccinated to successfully defeat this virus.

To find all the places where you can get vaccinated in Northern Kentucky, go to <https://nkyhealth.org/individual-or-family/health-alerts/coronavirus-covid-19-home/covid-19-vaccination/>.

###

The Northern Kentucky Health Department provides high quality public health services to more than 400,000 residents of Boone, Campbell, Grant and Kenton Counties, with a goal of preventing disease, promoting wellness and protecting against health threats. The Health Department seeks to be a nationwide leader in public health, and was one of the first in the country to earn national public health accreditation.
